Technology occupies an important place within students' lives. A tool is an instrument used for doing work. It can be anything that helps you accomplish a goal. Instead of using Technology we are adopting this. This tendency tends us to the slavery of technology. Our goal is to change the state of being treated. Our aim is to trigger the innovative entity of individuals to promote entrepreneurship of new technology. Our classroom oriented effort can be a tool to fulfill this objective. This effort is titled as 'Smart Studio'.
